Profile

Industrial engineer with a focus on quantitative methods and technology, with work experience in data analysis and IT process management. Skills centered on a comprehensive understanding of IT processes, the application of analytics for business strategy, and the use of natural language processing methodologies. Methodical, direct, and results-focused. Interests in academic research, development, and application of artificial intelligence for business intelligence, social policing, and accessibility.

Languages

Spanish	**C2**
English	**C1**
French	**B1**
German	**A2**

Hard Skills

- Advanced data analysis
- IT process management
- ML, DL & AI development
- NLP
- Agile methodologies
- Process transformation
- Data Engineering

Soft Skills

Problem resolution	Teamwork
Creativity	Critical Thinking
Adaptability	Attention to detail
